

One engine. *Your risk, your call.*

Most services hand you a single strategy and hope it fits. RigaCap is a **risk dial** — the same regime-adaptive engine, tuned to your appetite. Preserve capital, or push for maximum return. You set the level; we adapt to the market.

CONSERVATIVE Preserver	BALANCED DEFAULT Preserver	AGGRESSIVE ADD-ON Maximizer
← lower drawdown · steady growth · maximum return →		

UNDER BOTH TIERS · THE CORE ENGINE

Core — the momentum engine with a **20-year track record** (8.3% annualized · 0.73 Sharpe · 19% worst drawdown, 2007–2026, survivorship-free). It's the proof and the foundation both tiers run on — not a separate product.

BASE · FLAGSHIP

Preserver

"Behavioral capital insurance."

For capital-preservers, retirees, advisers, \$250k+ accounts.

31% ANN. (LAST 2Y)	1.75 SHARPE	–13% MAX DRAWDOWN
------------------------------	-----------------------	-----------------------------

Through 2021–26 (**including the 2022 bear**): 19% ann · 1.33 Sharpe · –13% DD — roughly **half the drawdown** of a straight momentum book, in turbulence.

\$129 /mo · or \$1,099/yr

The proven engine + regime-adaptive defense. Keep the upside, cut the pain.

Risk owned: the least — no exposure to a momentum-crash tail. Gives up a little in calm melt-ups; that's the insurance premium.

ADD-ON · AGGRESSIVE

Maximizer

"Offense with a seatbelt."

For aggressive, risk-tolerant growth-seekers.

49% ANN. (LAST 2Y)	1.94 SHARPE	–17% MAX DRAWDOWN
------------------------------	-----------------------	-----------------------------

Through 2021–26: 36% ann · 1.61 Sharpe · –20% DD. Routes the market's dominant regime to a **higher-return breakout engine** — with a **momentum-crash volatility brake** that roughly halves the worst tail.

+\$100–120 /mo · ≈ \$229–249/mo

A paid add-on to the base. Priced for serious investors who accept the risk.

Risk owned: a momentum-crash tail — the rare year the trade unwinds. We tame it mechanically (halved), but it is **reduced, not eliminated**. Choose this only if a rough year is one you can stomach.

The honest part: we tell you each tier's cost up front. Preserver trails in a smooth melt-up; Maximizer owns a (tamed) crash tail. We'd rather you pick the right level than sell you the wrong thing. · **Signals only** — you execute at your own broker.

All performance figures are BACKTEST results, survivorship-free, and validated across cross-period holdouts and daily-resolution drawdowns. The Preserver and Maximizer tiers are currently research-stage; the Core engine is live. Not financial advice. Past results do not guarantee future returns.
