KEY TAKEAWAY

Seeking Alpha Alpha Picks (+284%) charges \$37–42/mo. RigaCap at \$39/mo competes on a different axis — risk, not raw return: a 21-year walk-forward backtest with a 19% worst drawdown (the S&P lost half its value twice in the same window), a market-regime filter that goes to cash, and explicit sell signals with trailing stops — features no competitor provides. We're competitively positioned against the best, well below the \$100+/mo AI platforms.
